

SPS Module – Plants and Plant Products Export Certificate application process

Exporter or Customs Broker
(Prior to exportation)

Biosecurity

To facilitate exports, Biosecurity can consider omitting analysing, accepting, inspection and approving applications for authorised operators (Kava Exporters) and maybe their approved products. Should this is considered and should these exporters hold a prepaid and/or credit account with Biosecurity, their applications can go directly from submission, to approval and payment; no intervention from Biosecurity would be required whatsoever. Biosecurity will just need to monitor the applications and conduct other compliance checks activities.
